

GarageBand: Adding Sounds and Jingles

1.

2.

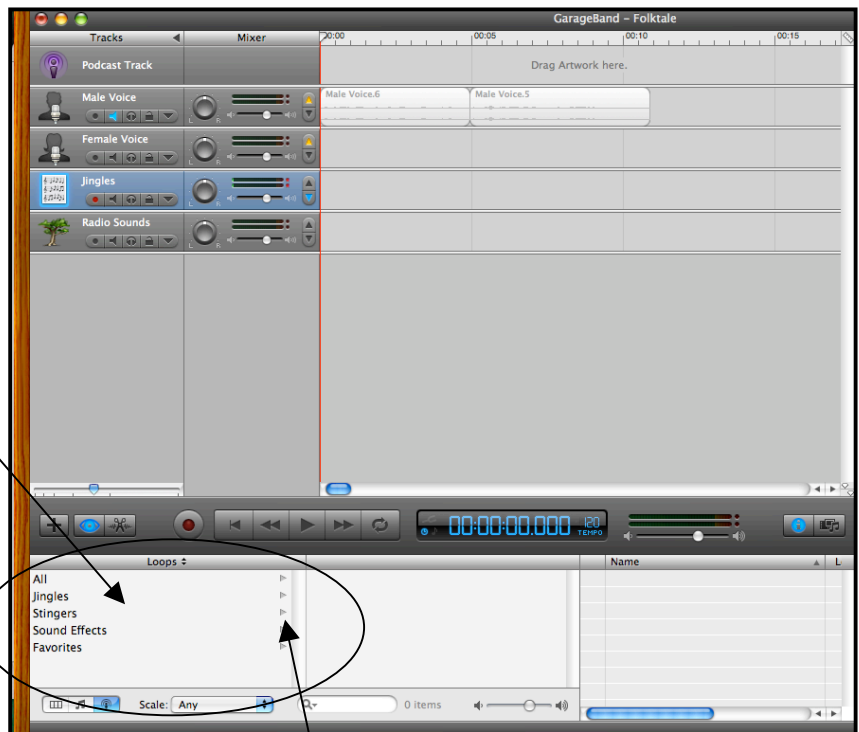

3.

Your choices for background music and sound effects are located here.

ALL- will give you all of the options for music and sound effects.

Jingles- music only

Stingers and Sound Effects are --sound effects

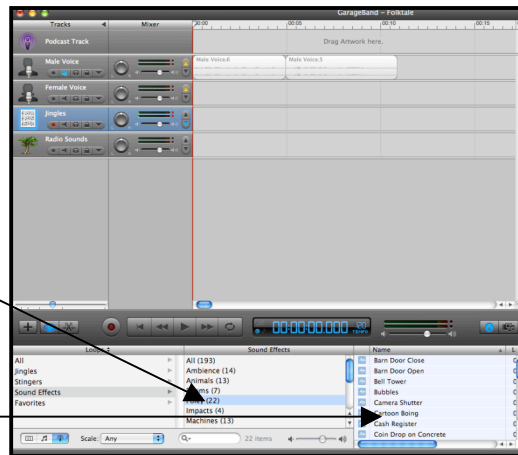

4.

Click on the arrow next to the category you want to look in..

5.

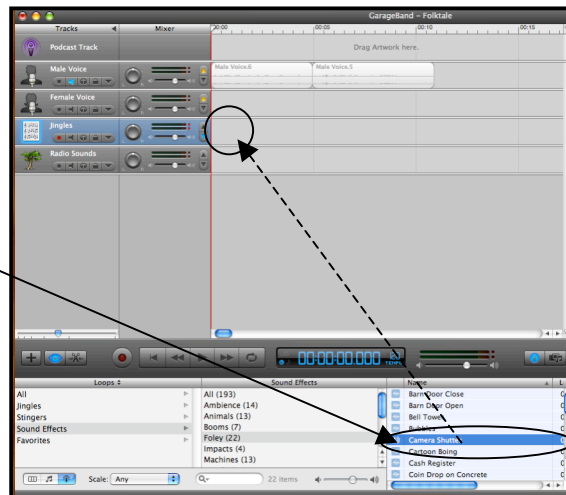

Find the sound effect or music you like by clicking on it and listening!

6.

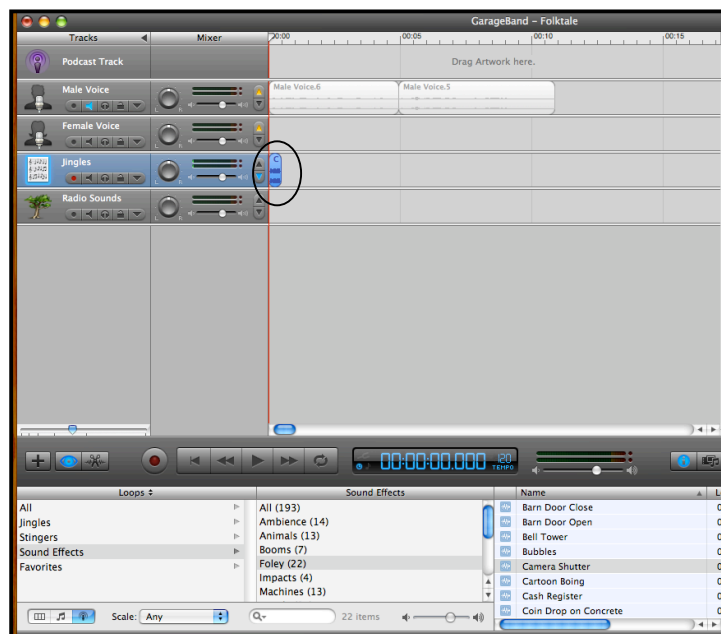

7.

Click and drag the sound effect or music you want up to the jingle track in your project.

8.

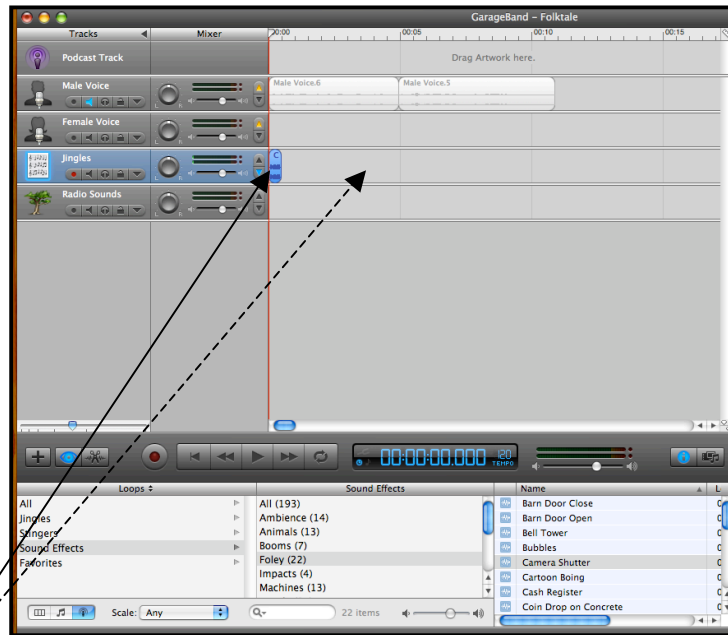

It will show up in your jingles.

9. Moving the Sound Effects or Jingles

If the sound effect or music is not where you want it to be, you can drag it to where you want it to be in your project.

1. Make sure your mouse looks like a normal black arrow.
*Make sure that your mouse doesn't look like a curved arrow...or it will extend the sound effect/music instead of moving it!
2. Click in the middle of the sound effect or music track and drag it to where you want it.

10.

This is what it will look like after you move it!. You should listen to it many times to make sure that it sounds the way you want it to!
